Professional Experience

Software Engineer | Steele Consulting Inc | May 2019 – Present

- Full Stack Development using MS SQL or Postgres databases, Entity Framework, C# .NET / Core web APIs, and Angular 2+ / AngularJS frontend. Development tools include Azure DevOps, Grunt, and Webpack.
- Mobile application development and expansion of functionality using Ionic Framework, Angular, IndexedDB, and SQLite.
- Meet regularly with remote clients to gather requirements and collect feedback using agile methodologies.

Estate Assistant | Madison Lakefront | April 2003 – March 2018

- Coordinated multiple schedules with various staff.

Developer | Exponential Entertainment | August 2011 – June 2012

- Maintained, updated, and engineered Social Games using Flash CS5, ActionScript 3, XML, HTML, CSS, PHP, JavaScript, and Photoshop creating a social media presence.
- Implemented a redesign and re-size of existing Flash games for Facebook. Adding interaction through social media API's such as Facebook, Hi5, and Twitter using Flash CS5, Photoshop, ActionScript 3, and XML keeping games relevant and interesting.
- Part of a team that developed a large Social Media Game. Responsible for incorporating several individual games into a larger application using ActionScript 3, XML, JavaScript, JSON, PHP, HTML, and CSS.

Developer | Vendaria Media | September 2010 – March 2011

- Developed a product selector with shopping cart functionality for Home Depot using OOP ActionScript 3, XML, and JavaScript. Allowing users to compare and purchase products.
